E-Type TX Press Head

TECHNICAL FEATURES

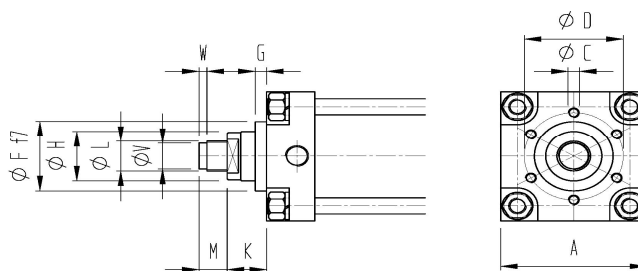

The E-Type Press Head is a hydropneumatic unit that exploits the incompressibility of liquids in order to generate high thrusts by using compressed air as its power source

- 12 models with approaching stroke
- Range of 7 to 470 kN thrusts at 6 bar pressure
- Max. Operating pressure is 10 bar
- Configurations that enable to deal with any application
- Without external oil tank
- Approaching cylinder with magnetic piston as standard
- Test sheet & user manual attached
